Hello, I'm Wojciech Palacz and I work as a Frontend Developer for over 4 years. Currently I work for Hycom S.A. where i'm responsible for agricultural ecare platform based on BFF architecture.

Working experience

Hycom S.A. november 2021 - now

Developing two projects, first internal project based on BFF architecture with Nest.js on BE for aggregating traffic for FE and Next.js on FE. Second project for Agriculture E-care platform with same architecture and similar tools, but much much more extended with its capabilities and

functions.

Investcore november 2020 - october 2021

Developing core features of medical service based on React 16.12, Redux, Redux-thunk, Redux-toolkit, Chart js, Material-ui & Formik. Strongly typed with Typescript.

mBank S.A. april 2020 - november 2020

Developing of core marketing product that customizes web platform content based on users choices. React & Typescript & vanilla js environment.

Miinto Group october 2019 - april 2020

Development and support of core internal Miinto product. Stack based on React, Redux, Saga and full REST API communication for CRUD operations. Most recently I had started rewriting process consisted of webpack ugrade and rewriting specific sites from .net MVC into React.

Skills

JavaScript Typescript CSS/SCSS React & Next.js Redux & Xstate Redux Thunk & Redux Saga Strapi CMS GraphQL Nest.js

Over the horizon

Efigence may 2018 - september 2019

Efigence as the leading software house was responsible for variety of project so I could touch many different development areas. I was creating mailings, single websites and more complex web apps such as Pekao bank, PFR or Moje PPK website build on Java related CMS, Freemarker and Javascript.

Citi Europe may 2011 - april 2018

I was responsible for fund administration and accounting of Luxembourg investment funds.

Technologies

- React & Next.js (multiple different tasks)
- Redux & Xstate (handling state management across whole app)
- Reselect (for memoization)
- Coas (as we also as a literational between a second as a literation of the second as a literat

Typescript mastery	 Saga (asynchronous iterations, http:requests) Rodux Thunk / Rodux toolkit (asynchronous requests)
UI Design	 Redux Thunk / Redux toolkit (asynchronous requests)
	DECT ADI (CDIID an arationa) & CranhOl an arationa
